

Feedstock Buyer

North West of England

PVCR Ltd are looking to recruit a Buyer to purchase feedstock for our recycling facility in Runcorn. PVC recycling is a convenient, economical and socially responsible way of protecting our environment. As a subsidiary of REHAU UK Ltd, PVCR is focused on growing the circular economy and we see innovation within PVC recycling as pivotal to our global sustainability strategy. By recycling post-consumer PVC windows and doors, PVCR minimises waste costs whilst realising the future value of recycled PVC and reducing the impact on landfill.

Your role:

The primary focus of the role is to ensure the continued supply of feedstock to our Runcorn facility. This will include the purchase of both post-consumer and post-industrial uPVC frames and off cuts. This is a national role that will require travel throughout the UK, visiting suppliers and building relationships to offer the best service in the industry and ensure we have up to date market intelligence. Managing quality is also a key part of the role and you will be responsible for ensuring our suppliers adhere to our quality specification. Finally, liaising with our parent companies sales team and manufacturing facilities, you will work to develop an efficient collection scheme, arranging the logistics and managing costs.

Your profile:

You will ideally have sales experience, preferably within the waste or associated industries. Confident and well organised, you will be comfortable with making your own appointments and ensuring efficient follow up and closure. You will also possess excellent written and verbal communication skills as well as a working knowledge of Microsoft Office Excel and Word. As you will spend most of your time away from the office, you will need to be resourceful and self-reliant. Ideally based around the north west Liverpool/Manchester area, candidates from other areas will be considered. You must possess a full, clean UK driving license.
