

Production Operative

Runcorn

PVCR Ltd are looking to recruit a Production Operative for our recycling facility in Runcorn. PVC recycling is a convenient, economical and socially responsible way of protecting our environment. As a subsidiary of REHAU Group UK, PVCR is focused on growing the circular economy and we see innovation within PVC recycling as pivotal to our global sustainability strategy. By recycling post-consumer PVC windows and doors, PVCR minimises waste costs whilst realising the future value of recycled PVC and reducing the impact on landfill.

Your profile:

We are looking for a dedicated and self-motivated Production Operative for our materials processing plant in Runcorn. There will be an opportunity for you to develop into a multi-skilled operative, with Fork Lift Truck and JCB training and licensing provided. Working for PVCR, you get to be part of a team that's making a real difference for the environment. You help recycle old PVC windows and doors, which cuts waste, reuses materials, and reduces landfill use. Plus, you get to be part of a company that's focused on innovation and sustainability. Sounds like a pretty rewarding job, right? We are looking for candidates with the following:

Technical Ability: Familiarity with operating and maintaining machinery, as well as understanding of production processes.

Experience working in an operational environment that involves hands-on work and exposure to diverse conditions is preferred.

Adaptability: Thrive in a fast-paced environment, managing multiple tasks within set timeframes while maintaining attention to detail and quality.

Problem-Solver: Ability to troubleshoot issues quickly and efficiently.

Communication: Strong interpersonal skills, able to interact effectively and professionally with colleagues with minimal supervision.

Your role:

Fixed Plant Operation: Operate machinery to oversee the production process, ensuring smooth operations and maintaining high-quality output. Continuously monitor the production process to achieve daily targets. Perform daily adjustments and lubrication of machines.

Health, Safety & Environmental: Comply with all legislation, policies, and procedures, prioritising and promoting safety in all aspects of work.

Maintenance: Replace consumable items associated with the production process, such as filters and drums. Ensure routine operational checks and maintenance tasks are completed in line with Standard Operating Procedures.

Site Operations: Operate the site and production processes safely and efficiently. Maintain high standards of plant cleanliness.

Team Support: Assist with other duties as needed, collaborating with colleagues to achieve production targets and maintain a high standard of work.

Continuous Improvement: Work within the team to continuously deliver performance improvements and ensure production efficiency and targets are met. Your profile:
